The overprints of Mexico's postoffice deserve a special mention. There are three types of overprint:

1. Gothic MEXICO done by hand, recognizable by the fact that MEXICO is not exactly vertical. Very early use. Rare, because this presumably was done only in the beginning of April 1872.

2. Gothic MEXICO exactly vertical, from a typographic setting. During the next couple of months this setting was used, to be followed by the curved Mexico around the middle of the year. Number 2 is identical in appearance to Number 1, but is vertical.

3. Curved MEXICO in capital letters. This overprint hangs mostly, more or less, to the right, seldom to the left. Exceptionally it is turned to the right by 90° (Figure 25).

3. Curved MEXICO in capital letters. This overprint hangs mostly, more or less, to the right, seldom to the left. Exceptionally it is turned to the right by 90° (Fig.

The **Tepeji de la Seda** cancel is only listed by Schatzkes for the 1856 issue. However, this cancel was re-introduced later and is listed by Karl Schimmer as **PUE 96/1** used after the 1874 period. Obviously, it was re-introduced while the 1872 issue was still extant, as the present copy proves. Quite scarce!
