CONFEDERATE "Altered Plate" Private Prints

Early in 1862, the Confederate Government ordered from the DeLaRue & Co. printing firm of London, England, typographed plates for printing 2c and 10c stamps by altering the existing 1c (Scott #14) and 5c (Scott #6) plates previously made by DeLaRue. Plates were delivered but never officially used.

Many years ago, printings were made from these plates, but it is believed to have

COMMEMORATING THE 69TH ANNUAL CONVENTION OF THE AMERICAN PHILATELIC SOCIETY
NORFOLK, VIRGINIA, SEPTEMBER 21, 22, 23, & 24, 1955

**Confederate "Altered Plate"
Private Printings**

In April of 1862, when it was decided to raise the letter rate from 5c to 10c, the Confederate P. O. Dept. sent an urgent order to De La Rue & Co. of London for 2c and 10c stamp printing plates. Electrotypes units of the earlier 1c (Scott #14) and 5c (Scott #8) stamps were promptly altered to "Two Cents" and "Ten Cents" by obliterating the old values and engraving in the new. A plate of 4 panes of 100 units, of each value was prepared and shipped via a Blockade Runner. The 10c plates reached the P. O. Dept. in Richmond, Va. but were never placed in use. The 2c plate never reached Richmond and was found 70 years later near New Orleans.

When Richmond was evacuated, a Federal Soldier "captured" the 10c plate, sawed it into sections, and gave them away as "Rebel" Souvenirs. Private Printings were made from sections of this plate many years ago. Those sections are now in a museum.

August Dietz, Sr. in his 1945 Confederate catalog stated: "... They may be properly included in a confederate collection on account of their historical status."
