I'm swamped in work & will answer on of your sheet to some time

Thanks a million for sending the copy Xerox of Study Circle's No. 3. I too had read it as I recognize the info. on it, but lost it.

A bit blurred are the reproductions of your cover, but they look completely legit to me. The Feb 1862 is OK for size, shape, & placement of date. I have 2 of them around Feb as pending arrival marks both. One difference: yours are 23 mm. diameter. Yours might be a bit wider? do have one other, 24 mm. wide, done in red

The B/137 is OK for size & from what I can see of it, no suspicious signs.

I haven't got wind of any of these British from Kathmandu office being faked. I saw

Got an auction catalog - mail sale from Zuluceta today. Second one his see I haven't had time to check every item carefully but don't see any real unusual items! I'd see things offered at wild prices. Recall be in business for himself these days. Recall worked for Alevigos for awhile.

Keepwell!
